

Knowing the value of tomorrow

How we are socially conscious through sustainable practices

What is sustainability to us?

How we **live today** for a **better tomorrow**.

Why a sustainability policy?

We know the value of tomorrow and we are actively weaving together a future where that value is realised.

The UN **SDGs** guide us, applied to our local context.

Our overarching principles?

Our biggest impact on sustainability comes from working with clients to improve their sustainability practices.

In Africa, it is crucial to find the balance between economic and sustainable development.

Sustainability at Bowmans

our building blocks

Think **sustainability** always

Spread **awareness** of UN SDGs

Help find solutions for **climate crisis**, biodiversity loss and environmental risks

Partner with clients on their sustainability journeys
